INTERNSHIP TASK ASSIGNMENT

Internship Details:

Applicant Name: Prajwal Gowda
Application ID: KTS020260811538
Internship Domain: Python Development Internship
Duration: 30 Days
From: 20 August 2026
To: 19 September 2026

ASSIGNED TASKS

"You must complete any 2 tasks from the list below."

Task 1: Student Management System

Description: Develop a Python-based application to manage student records efficiently. The application should allow users to add, update, delete, search, and manage student information while implementing Object-Oriented Programming concepts and file handling.

Key Features

- Student CRUD Operations
- Object-Oriented Programming (OOP)
- File Handling
- Search & Filter
- Exception Handling
- Modular Code Structure

Deliverables

- Public GitHub Repository
- Source Code
- README Documentation
- Project Report (PDF)

Task 2: Library Management System

Description: Build a Python application that manages books, members, and book issue/return records. The system should simplify library operations through an organized and user-friendly interface.

Key Features

- Book Management
- Member Management
- Issue & Return Books
- Search & Filter
- Data Storage
- Exception Handling

Deliverables

- Public GitHub Repository
- Source Code
- README Documentation

- Project Report (PDF)

Task 3: REST API Development

Description: Develop a RESTful API using Flask or FastAPI that performs CRUD operations with secure authentication, input validation, and proper API documentation. The API should follow industry-standard development practices.

Key Features

- REST API Development
- CRUD Operations
- JWT Authentication
- Input Validation
- Error Handling
- API Documentation

Deliverables

- Public GitHub Repository
- Source Code
- API Documentation
- Postman Collection
- README Documentation

Task 4: File Automation & Data Processing Tool

Description: Develop an automation tool that performs real-world tasks such as file organization, Excel processing, PDF generation, email automation, or web scraping to improve productivity and automate repetitive workflows.

Key Features

- File Automation
- Excel & PDF Processing
- Email Automation
- Web Scraping
- Logging
- Exception Handling

Deliverables

- Public GitHub Repository
- Source Code
- README Documentation
- Project Report (PDF)

Task 5: Capstone Project

Description: Build a production-ready Python application by applying the concepts and technologies learned during the internship. Choose any one of the following real-world projects and implement a complete solution with proper architecture, documentation, and database integration.

Suggested Projects (Choose Any one)

- Hospital Management System
- Library Management System
- Inventory Management System
- Employee Management System
- Student Management Portal
- Expense Tracker
- Task Management System
- Hotel Management System
- Bank Management System
- URL Shortener
- Weather Dashboard
- Online Examination System
- Billing Management System

Key Features

- Object-Oriented Programming (OOP)
- Database Integration
- Authentication & Authorization
- CRUD Operations
- Input Validation
- Exception Handling

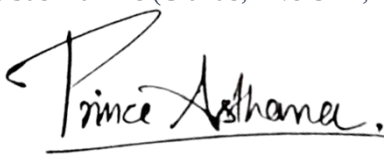

- Clean Project Architecture

Deliverables

- Public GitHub Repository
- Complete Source Code
- README Documentation
- Database Schema
- Project Report (PDF)
- Demo Video (3–5 Minutes)
- Live Deployment (Optional)

SUBMISSION GUIDELINES

1. Complete any 2 tasks from the list above.
2. Deploy on Vercel/Netlify and push code to a public GitHub repository.
3. Submit links (GitHub, Live URL, LinkedIn Post) for verification.
