INTERNSHIP TASK ASSIGNMENT

Internship Details:

Applicant Name: Bhoomika S
Application ID: KTS020260809831
Internship Domain: Java Full Stack Development Internship
Duration: 30 Days
From: 20 August 2026
To: 19 September 2026

ASSIGNED TASKS

"You must complete any 2 tasks from the list below."

Task 1: Employee Management System

Description: Develop a full-stack web application that enables organizations to efficiently manage employee records, departments, roles, salaries, and attendance. The application should support secure authentication and complete CRUD operations.

Key Features

- User Authentication & Authorization
- Employee CRUD Operations
- Department & Role Management
- Attendance Management
- Salary Management
- Search & Filter Functionality
- Responsive User Interface

Deliverables

- Public GitHub Repository
- Source Code
- README Documentation
- Database Schema
- Project Report (PDF)

Task 2: Online Banking System

Description: Build a secure online banking application that allows users to manage bank accounts, transfer funds, view transaction history, and monitor account balances through an intuitive web interface.

Key Features

- Secure Login & Registration
- Account Management
- Fund Transfer
- Transaction History
- Role-Based Access Control
- Input Validation

Deliverables

- Public GitHub Repository

- Source Code
- README Documentation
- Database Schema
- API Documentation
- Project Report (PDF)

Task 3: E-Commerce Web Application

Description: Design and develop a complete e-commerce platform where users can browse products, manage their shopping cart, place orders, and track purchases through a modern web application.

Key Features

- Product Management
- Shopping Cart
- Order Management
- User Authentication
- Admin Dashboard
- Responsive Design

Deliverables

- Public GitHub Repository
- Source Code
- README Documentation
- Database Schema
- API Documentation
- Project Report (PDF)

Task 4: Online Food Ordering System

Description: Create a full-stack food ordering platform where customers can browse restaurants, place orders, make payments, and track their orders, while administrators manage restaurants, menus, and deliveries.

Key Features

- Restaurant Management
- Menu Management
- Order Placement
- Order Tracking
- Payment Integration
- Admin Dashboard

Deliverables

- Public GitHub Repository
- Source Code
- README Documentation
- Database Schema
- API Documentation
- Project Report (PDF)

Task 5: Capstone Project

Description: Build a production-ready Java Full Stack application by applying the concepts and technologies learned during the internship. Choose any one of the following real-world projects and implement it using Java, Spring Boot, React, and MySQL/PostgreSQL.

Suggested Projects (Choose any one)

- Library Management System
- Inventory Management System
- Employee Management System
- Expense Tracker
- Hospital Management System
- Task Management System
- URL Shortener
- Weather Dashboard
- Student Management Portal
- E-Commerce Platform
- Hotel Management System
- Event Management System

Key Features

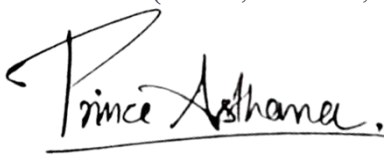

- Secure Authentication & Authorization
- RESTful API Development
- Database Integration
- Responsive User Interface
- Role-Based Access Control
- Exception Handling & Validation
- Clean Architecture

Deliverables

- Public GitHub Repository
- Complete Source Code
- README Documentation
- Database Schema
- API Documentation
- Project Report (PDF)
- Demo Video (3–5 Minutes)
- Live Deployment (Optional)

SUBMISSION GUIDELINES

1. Complete any 2 tasks from the list above.
2. Deploy on Vercel/Netlify and push code to a public GitHub repository.
3. Submit links (GitHub, Live URL, LinkedIn Post) for verification.
